

Factory

Economical and worry-free fixed-price managed apps packaging service

Improve your workflows by packaging hundreds of apps per month with Apptimized Factory

Apptimized experts work with various technologies in the field of software packaging for over 15 years. The gained experience is used daily in work and helps to solve even the most complex tasks.

All of them will be considered during the application packaging process by our specialists, and you don't need to be worried about best practices and the latest packaging technologies that will be implemented automatically. As a leader of application packaging market, we guarantee you will receive a high-quality package within accurate timeframes and for a fair and reasonable price. Fortunately, you don't need to have your own packaging department and spend money in vain on its infrastructure maintenance and support.

BENEFITS TO YOUR ORGANIZATION

Best experience in your package

All installation and configuration requirements, the best practices of Microsoft and the latest packaging technologies will be including into your package.

Anytime, Anywhere

Control the process of packaging your product from the upload to the final stage of getting the finished useful package.

Test environment

Test your package on a specially prepared clean virtual machine.

Key Product Features

Simple and fast solution

Creating a packaging request will not take more than 20 minutes, and the package itself will be ready within 4 working days from the time your request is confirmed.

Easy to stay modern

Apptimized keeps you up to date. As soon as a status changes or you are assigned a todo you will be informed by e-mail.

Use familiar tools

Packages can easily be integrated into your deployment tool with the help of the SCCM and Intune interface, with just a few clicks and without any additional tools. This saves time and manual effort.

Keep in touch

Technical support 24/5 from specialists who are ready to inform you about the status of the package and answer all your questions.

Test before deploy

Review the packages for quality requirements before integrating and distributing them into your environment. Apptimized provides you with a test environment in the cloud - just as you would expect from a reasonable IaaS solution.

Structure your requirements

Existing discovery documents can be uploaded for re-use. Discovery documents can also be easily created in the Apptimized portal. This step is part of the end-to-end process and allows to "record" your installation requirements in real-time on a virtual machine. It also supports editing and downloading documents for further use.
