---

Economical and worry-free fixed-price managed packaging service.

Apptimized experts work with various technologies in the field of software packaging for over 20 years. The gained experience is used daily in work and helps to solve even the most complex tasks.

No matter the size of your business, you definitely face daily problems with the variety of applications, their updates and installations. With the regular release of updates across your applications making it an almost impossible task to keep up for your specialists and the end users..

Apptimized Factory solution delivers an exclusive platform where you are able to set your installation and configuration requirements simply. Apptimized Factory takes into consideration all your requirements during the application packaging process; carried out by our expert team of specialists. We apply best practice at every stage, implementing the latest packaging technologies.

BENEFITS TO YOUR ORGANIZATION

Best experience in your package

Synchronise the installation of all applications within the company. Apptimized Factory can ease this burden, leaving you able to focus on other pressing tasks.

Anytime, Anywhere

The Apptimized cloud solution gives you complete control of the packaging process from the initial vendor media through to the finished product.

Test environment

The debugging processes inside the system allows you to check the package without leaving the system, on a specially prepared clean virtual machine.

Key Product Features

Simple and fast solution

Creating a packaging request will take up to 20 minutes, once your request is confirmed the package itself will be ready within 4 working days. As a technological leader in the application packaging market, we guarantee that you will receive a high-quality package within set SLAs at a reasonable price, taking away the need to create your own costly packaging department.

Keep in touch

Apptimized keeps you up to date. As soon as a status changes or you are assigned a todo you will be informed by e-mail.

Use familiar tools

Application packages can be quickly and conveniently transferred into your SCCM and Intune environments with our connectors in a couple of clicks, saving you time and efforts.

Easy to stay modern

Once your applications are ready to request, you can set the priority by selecting a standard delivery time or if you need it in a hurry, select urgent.

Test before deploy

Review the packages for quality requirements before integrating and distributing them into your environment. Apptimized provides you with a test environment in the cloud - just as you would expect from a reasonable IaaS solution.

Structure your requirements

Discovery documents can be uploaded for re-use or they can be easily created in the Apptimized portal. The discovery documentation is part of the end-to-end process, which allows you to record your installation requirements in real-time using a virtual machine. It also supports editing and downloading of documents for further use.
