

IntuneWin Bulk Conversion

No apps left behind

Cloud-Ready in Minutes: Effortlessly Transform SCCM Apps to Intune

The IntuneWin Bulk Conversion feature revolutionizes the way organizations transition from on-premises SCCM to modern, cloud-based Intune management. This innovative tool is designed to automate and simplify migration, minimizing the time and effort traditionally associated with such processes. By supporting the conversion of up to 100 application packages simultaneously, it empowers IT teams to handle large-scale migrations with ease. With built-in testing capabilities and flexible customization options, IntuneWin Bulk Conversion ensures high reliability, scalability, and transparency, making it an essential solution for modern IT environments.

The IntuneWin Bulk Conversion feature not only accelerates the migration process but also enhances efficiency by reducing manual errors and streamlining workflows. Its intuitive interface and seamless integration with existing deployment tools enable IT professionals to focus on strategic initiatives rather than repetitive tasks. Additionally, the solution supports various package types, offering compatibility and versatility to meet diverse organizational needs. With comprehensive reporting and progress tracking, IT teams can monitor every stage of the conversion process, ensuring a smooth transition to Intune while maintaining control over application delivery and user experience. This feature is a game-changer for enterprises aiming to embrace cloud-based management with confidence and precision.

Key Product Features

- Seamless Transition to the Cloud: Simplify and speed up your migration process from on-premises SCCM solutions to modern Intune cloud-based management with automated conversions completed in minutes!
- One-Time Setup Conversion Templates: Set up conversion parameters once for a project and reuse them as templates for all future conversions.
- Flexible Conversion for Any Package: Convert any SCCM package, whether CMD-based, PSADT-based, or others, using flexible settings.
- Built-In Package Testing: Verify package reliability with automated tests for successful installation and uninstallation of SCCM packages before IntuneWin conversion.
- Massive Scalability: Convert up to hundreds applications at once, saving time for large-scale migrations.
- Real-Time Monitoring: Get immediate visibility into the status of your conversions with detailed progress tracking.

BENEFITS TO YOUR ORGANIZATION

IntuneWin Bulk Conversion is a fully cloud-based service.

Reduces IT workload by automating complex migration tasks, lowering operational costs.

Automated conversions are completed in minutes, helping your transition to modern management.

Simplifies complex transitions with intuitive workflows and real-time tracking.
